

INSIGHTS

**The profession  
needs relevant,  
accessible data  
to make sense  
of the bigger  
picture, tell a  
story and show  
connections.**

**Currently:**

*There is a **gap** in  
our ability to join  
up our knowledge*

*There is a real  
**hunger for data**  
and evidence*

*There is an  
**ocean of data***

*Each agency  
provides **different**  
**insights** and different  
information*

*The ability to  
use the information  
provided by agencies  
is **largely untapped***

*Most data on  
existing leadership  
is **qualitative***

**How  
agencies can  
contribute:**

*Work within the  
complex eco-system  
of information to  
**join up the many  
pieces***

*Get better at  
going from **policy**  
to **practice***

*Develop **systemised**  
**data and intelligence**  
about leadership  
to support the  
profession's work  
with learners*

*Work **alongside**  
**other agencies**  
to get better  
alignment*

*Support all areas  
of leadership of the  
profession to have  
an **evidence-based**  
profession*

**Agencies involved:**  
NZQA, ERO, TEC,  
MOE, EC, ENZ
